GAM (Global Authority Metrics)

November 2020 — January 2022

Global Authority Metrics is a dispute resolution platform where dispute agents can create dispute on behalf of customers and it will go through various approval steps such as endorser, approver and waiver. Finally it will provide a resolution to the customer.

My Show&Tell

October 2018 — November 2020

My Show&Tell is a marketing tool which enables the user to brief about a product with images and his/her video or audio. This will help the user to present about the product more efficiently than a normal photo or a normal video. This product is mainly focusing on the resellers or the product owners.

Call With Doctor

April 2016 — October 2018

Call With Doctor is a mobile application designed for patients. It enables the user to consult with his/her doctor online. It also allows the user to intimate the doctor about their interest when the doctor is not available for consultation. In the same way it notifies the patient when the doctor is ready for consultation. Patients can share their document if they want to share document with doctor.

V-Detail

November 2015 — April 2016

V-Detail is a secure video detailing platform for digital marketing. The main function of V-Detail is to solve the problem with the Rep's in person meeting with the Hcp. The Medical Rep can record a video along with the presentation and send the link to the HCP. The HCP can now view the recording and the detailing at his/her free time.
