OBJECTIVES

Get my foot in the door, working with experienced developers to learn the ins and outs of the industry. I aim to master the development aspect first then widen my knowledge base to other areas such as project management.

SKILLS

- Java
- HTML5
- CSS3
- Javascript
- SQL
- Networking basics: CCNA level 1
- Agile/ Scrum/ XP (extreme programming)

EMPLOYMENT HISTORY

Carter Holt Harvey Woodproducts - Assistant Manager/Floater

June 2012 - February 2013

Started as a labourer and was promoted to assistant manager quickly as my potential shone through. This gave me responsibilities such as organizing paperwork required for onsite builders and factory workers, assigning work to the factory based on urgency and maintaining the business database. Using my software knowledge I was able to implement macros to streamline some of these processes.

EDUCATION

AUT University

June 2009 - June 2012 | Bachelor of Computer and Information Science
Software Development Major

- The majority of programming was done in Object Oriented Java along with integration of other technologies (XML/CSV, SQL, JOGL)
- Vast experience with the Software Development Lifecycle
 - Introductions to a wide range of Development Methodologies with a focus on agile techniques
 - Practice with Project Management Methodologies, mainly SCRUM

In my final year my team developed a content management system which offered an innovative alternative to typical UI menus and lists. This was executed using Agile and XP project management methodologies and my role was both programmer and team Product Owner.

Manurewa High School 2003-2008

NCEA Level 3 (Calculus, English, Physics, Art Design and Physical Education)

INTERESTS

I love music and have played guitar since I was 13. I also play piano, write lyrics and produce my own songs. I enjoy sketching and creating digital imagery. One of my favourite papers at university was Computer Graphics and Animation and have made some short animations (gif, flash) in my spare time since then.
