React.js

James Baine

Web Developer
Los Angeles

Summary

Web developer with a passion for learning with an endless supply of optimism and curiosity.

One of my stronger points is writing front ends that are smooth, simple and aesthetically pleasing. I primarily use languages and libraries such as Javascript, CSS, Sass and React. I'm also constantly learning new ones to try to find more efficient ways of doing things.

I am also growing increasingly comfortable and familiar with back-end development using Node.js, MySQL, Sequelize, MongoDB, etc.

Before programming, I actually have a background in music. I have experience working at a world-class recording studio in Hollywood, where I was pursuing a career in sound engineering. I would love the opportunity to work as a developer with a company that makes music production and recording software or is involved in the music industry in some capacity.

I'm based in LA right now but I love traveling and going to new places so I am open to relocating if need be.

Technical Expertise:

• Javascript • ECMAScript 2015 • React.js • Handlebars.js • jQuery • AJAX
• HTML5 • CSS3 • Sass • Responsive Design • Node.js • MySQL • Sequelize • Mongo • Mongoose • Express.js • Webpack • Firebase • JSON • Git • Github • Gulp.js

Experience

U.S. Census Bureau
Census Enumerator
July 2020 - Present (6 months)

Los Angeles County, California, United States

- Conducted interviews with residents in assigned areas by following stringent guidelines and confidentiality laws.
- Completed interviews with reluctant respondents by explaining the importance of Census and the benefits of having an accurate count
- Assessed quality control on selected addresses and maintained records for quality control verification
- Complied with accuracy standards while maintaining high production rates
- Conducted enumeration of individuals experiencing homelessness in targeted outdoor non-shelter locations
- Coordinated daily to review and submit work and time and expense documentation

BevMo!

Sales Associate

October 2016 - Present (4 years 3 months)

Greater Los Angeles Area

Wilshire Financial Network

Web Developer Intern

August 2017 - January 2018 (6 months)

Greater Los Angeles Area

- Wrote custom theme and plugin functionality using PHP on company WordPress site
- Built user friendly, front end interfaces using HTML, CSS, JS and PHP
- Researched and categorized brokerage firms for storage within a local database
- Assisted in editing and maintaining websites
- Utilized SEO methods to support online presence of websites

Paramount Recording Group

Studio Assistant

February 2015 - April 2016 (1 year 3 months)

Greater Los Angeles Area

- Booked studio sessions by interfacing between ownership, clients and sound engineers
- Drafted invoices and excel spreadsheets to itemized artists expenditures
- Took care of high profile clients and made sure they had all the food, refreshments and other things they need to be comfortable in their recording sessions
