Ashley Colletti

Full-Stack Software Developer
Greater Chicago Area

Summary

I'm a Developer who loves to build software that can improve our everyday lives and make us more productive. I've taken my experience working with end users and now apply it to custom software for clients to make the most of their ideas.

Experience

Shedd Aquarium

Application Developer

January 2019 - Present (2 years)

Chicago, Illinois

Summary of Role:

- Full-Stack software development primarily using Ruby on Rails, React, tailwind, AWS, C#.NET, handlebars, FormatJS, Node.js, WSL, Visual Studio, RubyMine, VS Code, github and git

Claro Healthcare, LLC

Application Developer

June 2018 - November 2018 (6 months)

Chicago, Illinois

Claro Healthcare is a premier consulting firm with a depth of knowledge and singular focus on healthcare, collaborating with hospitals and health systems to help them navigate the unique challenges they face.

Summary of Role:

- Full-Stack Application development, primarily using C#, Visual Studio, and AngularJS on a number of applications, including both web apps and desktop software.
- Creating stored procedures, database queries, and uploading client data using SQL Management Studio.
- Re-designing and updating all existing dynamic report PDFs using Visual Studio.

The Difference Engine

Full Stack Web Developer

April 2017 - April 2018 (1 year 1 month)

Chicago

The Difference Engine is a web development agency that builds websites, internal platforms, and other development projects for non-profit and charity organizations on a pro bono basis. I'm on a team that is building a management system to help connect Veteran owned businesses with customers who require their services.

Summary of Role:

- Developing back-end features using Ruby on Rails with PostgreSQL
- Creating and consuming APIs
- Producing engaging front-end designs with AngularJS, React, JavaScript, and CSS
- Writing tests using RSpec

Moregidge

Junior Full Stack Web Developer

December 2017 - January 2018 (2 months)

Worked on navigation and partials for the mortgage application process. Responsible for creating new models, controllers and routes as necessary, using JavaScript, CSS, and Ruby on Rails.

Vivid Seats LLC

Business Process Specialist

October 2014 - October 2017 (3 years 1 month)

Chicago

Vivid Seats aims to provide fans with the safest, most affordable and convenient ticket purchasing experience in the live event industry.

Summary of Role:

- Acting as a liaison between the development team and operations center to implement process and protocol improvements
- Conducting tests on internal site to identify issues and propose solutions through user stories
- Managing administration of call center software; directing call flow, assigning appropriate skill levels and security access to different teams, creating new accounts, and assisting in the software integration process

- Creating reports through our MySQL database to track trends and identify areas for improvement

Promotions:

- Promoted from Sales Agent to Business Process Specialist - June 2016

Viper Communications LLC

Assistant Manager of Support Sales
