## EXPERIENCE

### Dista, Pune — Software Engineer (Field force management product)

Aug 2021 - PRESENT

- Working as a full-stack developer. Responsible for developing a fleet of products at Dista which is a startup.
- Revamped the complete product from AngularJS to new Angular 13.
- Designed the architecture of the new Front-End product single handedly which was configured with the previous monolithic backend.
- Since we were making intensive direction API calls on google direction API which was very costly, So implemented direction service which was based on OSM which was free of cost so a lot of costing for direction API was reduced.
- Architected and developed applications to encompass exciting use cases(Implemented own library for smart table representation).
- Understood, designed, developed and delivered efficient functionalities in a crunch of time.
- Created secure Rest API's to expose to clients.
- Currently working on Dista's biggest project handling the development part.

---

## PROJECTS

### Foodies Table — Android application

- Developed an android application whose sole purpose was to give different and innovative recipes.
- This application has all the users data and the user has a separate profile where the user can save his favourite recipe.
- The recipes have all the nutrition information of the selected dish.
- It also has a trending page where we show all the trending dishes.
