**Mobile: +918788119987**  
**Email: [Nileshkapde299@gmail.com](mailto:Nileshkapde299@gmail.com)**

#### **Summary:**

- I have 2.7 years of experience in developing web applications using **Angular** as a **Frontend** web designing framework.
- Expert level knowledge in UI Development Technologies by developing **Single Page Applications** (SPA) using **Angular, JavaScript, jQuery, HTML5, CSS3, Bootstrap, JSON** etc.
- Actively involved in total end to end software model with proficiency in **mapping client's requirements, application design, development, integration & testing.**
- Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts & utilize the same in a productive manner.
- Have good knowledge on consuming **REST API's.**
- Having good working knowledge on Angular Framework concepts like **Dependency Injection, Routing, Directives, Filters, Services and Two-Way Data binding.**
- Co-ordinate with the team's back-end developers on the process of consuming a **RESTFUL API, Custom Directives and nested JSON iteration.**
- Having good knowledge on writing **SQL queries.**
- Knowledge of **version control system such as GIT.**
- Hands on experience with tools such as Eclipse, Net Beans, Visual Studio Code, Edit Plus, and Notepad++.
- Understanding angular material.
- Ability to integrate third-party plugins.
- Ability to develop Responsive Web System.
- Worked in redesigning of company's web-based application.
- Worked as trainee in development of sample application Using Spring.

#### **Technical Skill Set:**

UI Technologies	Angular, JavaScript, jQuery, HTML5, Bootstrap & CSS3
Databases	SQL, MySQL
Programming Languages	Core Java
Development Tools	Eclipse, Visual Studio Code, Notepad++, Edit plus
Web Server	Tomcat, Glass Fish, Weblogic
Tool	Github, Maven, Log4j
Operating Systems	Windows 7/8/10

#### **Academic Information:**

- Completed The Post Graduate Diploma in Advanced Computing (DAC) from Center for Development of Advanced Computing (CDAC) Hyderabad in 2020.
- B.E. in Electronics and Telecommunication Engineering, Dhole Patil Collage of Engineering, Pune in 2017 with aggregate 73.13%

#### **Work Experience:**

- **Software Engineer (Aug 2021 – Till Date)**  
SBL Knowledge Services Ltd. Bangalore
- **Software Engineer (Jun 2020 – Aug 2021)**  
Digital Trust Technologies Pvt. Ltd. Hyderabad.

## **Professional Work Experience:**

### **1) Manappuram Gold Loan**

#### **Software Engineer**

Manappuram Finance Limited or MAFIL is an Indian non-banking financial company based in Valapad, Thrissure Kerala. Manappuram has over 4190+ branches across 25 states.

This application is mainly used for managing the customers and the day to day activities of the firm.

#### **Roles and Responsibilities:**

- Working as a team member to understand the client's requirements.
- Fixing the defects raised by QA team.
- Developing the components using with Angular and integrating the API services with user interface.
- Designing and customizing web pages using angular directives.

**Environment:** Angular, JavaScript, Typescript, HTML5, CSS, Bootstrap.

**Tools:** Visual Studio Code

### **2) e-KYC**

#### **Software Engineer**

e-KYC is a solution which enables the process of gathering real-time customer data adaptable in any kind of business process system like banking, telecom etc. The acronym of KYC is Know Your Customer.

Performing KYC process using a paperless solution is called e-KYC. It authenticates the customer, based on details provided by customer himself like digital copy of documents issued by the government or any issuing authority, biometric details like finger print data, digital photo copy of customer etc. All these details are stored digitally, which makes it cost effective and maintainable.

We can share these details with other 3<sup>rd</sup> party services, for verification. And based on verification service's response decisions can be made whether to extend the business process for the particular customer or not.

#### **Roles and Responsibilities:**

- Writing functionality to the forms using Angular.
- Working as a team member to understand the business requirements.
- Fixing the defects raised by QA team.
- Developing the components using with Angular and integrating the API services with user interface.
- Worked on Angular Routing concepts.
- Designing and customizing web pages using angular directives.
- Develop core functionality with Angular framework and JavaScript.
- Write operation contracts methods to return data in JSON format.
- Re-designed the application UI through Angular.

**Environment:** Angular, JavaScript, Typescript, HTML5, CSS, Bootstrap.

**Tools:** Visual Studio Code

### **3) Registration Authority**

#### **Software Engineer**

A registration authority (RA) is an authority in a network that verifies user requests for a digital certificate and tells the certificate authority (CA) to issue it. RAs are part of a public key infrastructure (PKI), a networked system that enables companies and users to exchange information and money safely and securely. The digital certificate contains a public key that is used to encrypt and decrypt messages and digital signatures.

#### **Roles and Responsibilities:**

- Developing the Angular 8 project from scratch.
- Worked on Angular Routing concepts.
- Cooperating with the back-end developer in the process of building the RESTFUL API.
- Develop web based user interfaces using HTML5, CSS, Bootstrap and Angular.

**Environment:** Angular, JavaScript, Typescript, HTML5, CSS, Bootstrap.

**Tools:** Visual Studio Code

#### 4) Web-KYC

##### Software Engineer

We integrate our web-KYC application with Binocl server. Binocl platform is a novel solution specifically developed to facilitate seamless integration of web applications with native libraries and devices and to provide easy to use Java Script APIs for web application integration.

##### Responsibilities:

- Engaged in Analysis, Design, and Developing.
- Developing the Angular 8 project from scratch.
- Designed the application UI through Angular.

**Environment:** Angular, JavaScript, Typescript, Html5, CSS, Bootstrap.

**Tools:** Visual Studio Code

#### 5) NITA (National Information Technology Authority Uganda)

##### Software Engineer

National Information Technology Authority (NITA) .we have developed UGPASS mobile application. Using tis app citizens of Uganda can register themselves, authenticate using NIN card and use services like signature service to sign documents.

##### Roles and Responsibilities:

- Designed the application UI through Html5, CSS, Bootstrap, jQuery, JavaScript.

#### Personal Details :

- |                            |                            |
|----------------------------|----------------------------|
| ▪ Name                     | : Nilesh Tanaji Kapde      |
| ▪ Date Of Birth            | : 02-Jun-1996              |
| ▪ Gender                   | : Male                     |
| ▪ Nationality              | : Indian                   |
| ▪ Marital Status           | : Single                   |
| ▪ Language Proficiency     | : English, Hindi & Marathi |
| ▪ Passport                 | : Available                |
| ▪ Alternate Contact Number | : 8421588650               |

#### Declaration :

I do hereby declare that the above given statements are true and correct to the best of my knowledge.

Place: Bangalore

Date:

Yours truly,

Nilesh Tanaji Kapde
