## EXPERIENCE 3 YEARS

### Associate Consultant

#### Capgemini India

Sept 2021 – Present    Bengaluru

- Integrated Access Layer with an external endpoint in the COLID application.
  - Developed a feature that enabled user to export their data in document format using a third party integration.
  - Worked in developing three micro apps that were inter connected with each other using i-frame.
  - Developed a functionality that enabled users to perform operations on multiple resources at once that was initially only possible to apply on individual resources,
  - Revamped various important functionalities that compromises a major chunk of the code, after analyzing different pain points of users and usage of various features which are now cleaner and more easy to use. It improved the application and saved a lot of users time.
  - Debugged the applications to fix mistakes in code to make sure they are error free for network administrators and end users.
- 
- Apart from developing major customer facing features I was also involved in another project which directly impacted our metrics:
  - Worked on Azure Databricks to Migrate data from a view table according to various time slots into the Neptune Database on AWS. This helped in keeping the data base on AWS up to date.

### Senior Analyst

#### Capgemini India

Aug 2019 – Oct 2021    Mumbai

- Developed features for an application Relationship Manager that is used to visualise various relationships between the resources.
- Developed a feature to enable Excel and Json file export. Using this functionality the user could export certain data from angular application into their local machine in either excel or Json format. This helped users to internally share their information in offline formats.
- Worked closely with 12 members of the development team to develop technical solutions for the applications using agile format in sprints using Azure DevOps, Gitlab.
- Development tasks on Angular and GRAPH Database (HTML, JavaScript, CSS, Dotnet core 3.1 and SPARQL queries).
- Interpret requirements and create project plans to meet schedule and quality goals.
- Day to day tasks included adding new features to the website and maintaining the good coding standards.
- Preparation of Wireframes for UI design requirements for the three applications.

## PROJECTS

Inventory Management AppA shopping application that had both customer side as well a Admin side and it helped in managing inventory items for a shop

A graph and data based project that I am currently working on:
