## WORK EXPERIENCE

### Senior Software Engineer

MindTree(Volvo GDS)

06/2021 - Present

Hyderabad

I worked as an Angular developer at Mindtree. While working at Mindtree have developed and implemented numerous application using frameworks such as Angular ,NRWL structure in Mono repo architecture as well as worked on unit testing applications using jest frameworks

Role: Angular developer

- Developed web applications from scratch for Mindtree. Created code to incorporate wireframes and user stories into the application.

### System Engineer

TCS(Comsee Modernization)

03/2018 - 06/2021

Bengaluru

Comsee is frontline customer interface. Single view of customer is now modernized to provide real time straight through processing, replace legacy system, make simpler and better performance. Modernizing a legacy Monolithic application to a responsive Mobile First Micro-Services based platform, which improves customer service and reduces system risk

Role: full stack developer

- Involved in development of Web API with C# and UI with Angular. Working on stories in JIRA. Analysis of the issue reported to identify and fix the root cause . Performed unit testing, acceptance testing and integration testing. Managing Code Reviews and monitoring Code Quality and Maintainability.

## EDUCATION

### B.Tech(Mechanical Engineer)

Amrita University of Technology, Coimbatore in 2017.
